

Railway Management

Using **Chemistry** in
Harmony
with **Nature**.

NaturChem provides a comprehensive vegetation management service to the rail industry and to manufacturers with rail spurs at their plant sites. We will conduct regular surveys of raiiside vegetation and provide experienced specialists equipped for removing raiiside trees and vegetation. Our services include track spraying, tree and brush cutting, mowing and herbicide sales.

Our programs provide our customers with solutions that reduce maintenance costs and enable more efficient and safe operations. We offer year-round programs and can meet all of your vegetation management needs while maintaining a balance with nature. NaturChem can stop rail vegetation in its tracks.

We service:

- Along rail spurs
- In rail yards
- On rail ballast
- At grade crossings
- At rail switches
- Along rail sidings
