

HY-END Bifen ITP & S

Fire Ant Control that is: Effective and Convenient

Easy to Use - No Measuring!

Effective... HY-END Bifen controls Fire Ants where applied in and around telecommunications, power, utilities, and railroad systems equipment.

Convenient... The next generation of Fire Ant control is available in convenient 4 oz packaging. Individual packages are shipped and stored in user friendly, water proof buckets with 100 single application packets in each bucket. Hy-End Bifen is also available in a 64 oz. shaker can with 8 cans per case.

Applications:

NaturChem's HY-END Bifen is labeled to be used for Fire Ant Control in and around the following locations.

- >> Buried cables
- >> HVAC
- >> Cable television pedestals
- >> Pad-mounted electrical power transformers
- >> Telephone cables
- >> Underground vaults
- >> Telecommunications equipment (boxes, closures, interfaces, pedestals, protectors and terminals)
- >> Power and utilities equipment (camera housings, control panels, emergency light systems, fire alarm systems and lights/alarms)
- >> Railroad systems equipment (breaker boxes, railroad signals, traffic control boxes and signals, and transformer pads)

One shaker can covers up to 266 sq. ft.

One 4 oz packet covers 12" by 12" (1 sq. ft.)
